Emissions reduction targets

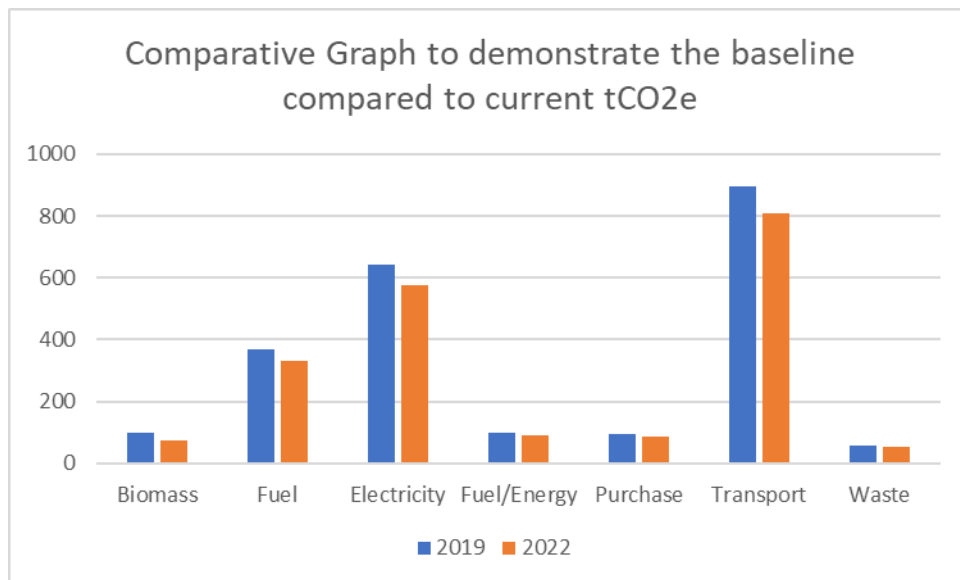

In order to achieve net zero we are adopting the following targets:-

SCOPE 1 and 2 Green house gas emissions to be less than 50% by 2030

And less than 95-100% by 2040 from our base line dated 2019

We intend to have a fully automated reduction plan by January 2026. Which will be integrated into our process flow.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2019 baseline. We project that carbon emissions will decrease through the reduction initiatives over the next five years to 2024 from the current 2019 position by 5% per year, to a total of 1745.41 tCO₂e by 2027. This is a reduction of 22.5%.

In the future we hope to implement further measures such as:

Active carbon reduction to date include:

Part 1 we acquired a woodland and wetland forest which we intend to develop and plant trees we have an initiative to plant trees this is not to carbon offset this additional is part of our progress to achieve net zero emissions.

Location:

LAT: 53.632037, LNG: -1.676810

///tabs.highlight.moon

We are a sustainability facility and reuse as much material and pass materials on to prevent contribution to landfill.

We have a commitment to the circular economy.

We are improving our reporting for scope 3, which will make our reporting much more accurate in the years to come.

We are working with our suppliers and encouraging them to work with ourselves to achieve net zero,

We are working towards and incentivising all employees so that everyone understands how net zero emissions can benefit the environment and business.

We have donated 200 items of furniture free of charge back into the re-use market, all of which is fully audited and have saved countless amounts of carbon. We have a huge push on remanufacturing, resizing, recovering services to for our customer, a drive towards a circular economy and sustainability.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
